

CU TR 032 Nameplate Requirements

The equipment must be marked in the form of the precise and nonerasable inscriptions containing the following information:

- a) the name and (or) designation of type, brand, model of the equipment
- b) parameters and characteristics which affect safety
- c) name of material from which the equipment is manufactured
- d) manufacturer's trade mark (where available)
- e) serial number
- f) date of manufacture

The placement of nameplate is determined by the design organization and is underlined in the operating manual.

In case it is not possible to place the nameplate on the equipment, it is allowed to be specified in the operating manual attached to the equipment.

From the Technical Regulation 032/2013 “On safety of equipment under high pressure”
