

General Provisions for the unified conformity marking of the Member States of the Eurasian Economic Community and the Customs Union – EAC mark

The unified mark confirms that the products marked with EAC marking have complied with the requirements of the technical regulations of the Customs Union.

Description of the EAC Mark

Example images of the unified mark are below (first two for proportion purposes):

The unified mark is a combination of three stylized letters: ‘E’, ‘A’ and ‘C’, with the same proportions, height and width. There is a contrasting background and the mark has to contrast with color of the surface of the product or its label, which it is put on.

EAC abbreviation stands for “Eurasian Conformity”.

The size of the unified mark may be specified by the manufacturer (supplier) that has received the right to use the unified mark. However, it must be at least 5 mm of size and clearly visible to the naked eye on the general background color of the object. The mark can be put on the product (label, package) in any way, but it has to be clearly visible during the lifetime of the product.

Order of application of the unified mark

Manufacturers (suppliers) have the right to use the unified mark, if the product has passed all the relevant Technical Regulation(s) of the Customs Union assessment procedures (confirmations), which are confirmed by the documents provided for appropriate forms of conformity assessment in the Customs Union (Declaration/s and Certificate/s to CU TR).

Rules of application of the unified mark

The unified mark is applied on each unit of production, packaging or accompanying documentation.

The image of the unified mark has to be one color and contrast with the surface color on which it is applied.

The place of application of the unified mark on the product, packaging and documentation is established in technical regulations of the Customs union.

From the Regulation on Common Mark of Products Circulation in the Market of the Customs Union member-states.
